- Patient Information Can Never Be Lost or Stolen
- Compliance with HIPAA Guidelines
- Scan and Convert Patient Records Securely in Your Office

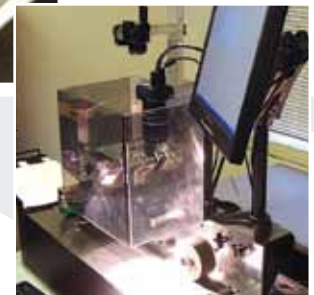

***Easy and Cost Effective***

## Portable OCR

## High resolution document scanner

**Tritek's user-friendly search and retrieval application makes electronic records easily accessible and easy to manage**

**Anticipate Electronic Medical Record compliance requirements today**

## The ***Tritek*** Advantage

### Key features of **TRITEK's** Document Scanning Equipment:

- Capture and store documents and pictures from any source
- Bulky and hard to read paper documents are converted to electronic files. Our equipment can handle onionskin paper, stapled papers, and handwritten notes in all sizes and shapes.
- Database easily integrates with third party applications for industry specific solutions
- Tritek equipment's on-site scanning capability means scanning is performed with minimal disruption to customers' businesses
- User-friendly search and retrieval application makes electronic records easily accessible and easy to manage
- Portable on-site scanning maintains security, no files need to leave the facility
- Portable scanning unit plugs into a standard wall outlet with no special power requirements
- Access documents and catalogued information 24 hours a day, remotely with approved access
- Reduce expensive office and storage space for archived records
- CD storage and Windows compatible (2000 or later)
- No special training required, just point and click
- Image zoom and rotate features included
- Access scanned documents from anywhere, anytime with an internet connection
- All information is encrypted and can only be viewed using a personal password
- All information can be stored on wallet-sized CD's- perfect for patients

### Nomad 007 Medical Document Scanning Equipment

Documents are placed laying flat at the feeder with the printed area facing up to the camera. Foot pedal controls allow hands-free operation.

Documents are singulated (can be intermixed in thicknesses) traveling automatically downstream past the scan area. Documents are scanned, indexed and stored. Bins can be added for sorting.

### Nomad 2 Document Scanner

The Nomad 2 is portable plugs into 120V AC receptacles and can read any type of document. It handles odd shapes such as handwritten notes, forms, or letters and any thickness ranging from single sheets to magazines. The high resolution 300 dpi imaging creates TIFF, JPEG or PDF files in black & white or color.

The workflow of all Tritek document scanning machines is highly configurable and integrates well with third party software applications. While Tritek includes Doc-U-Search - our own leading edge storage and retrieval software - the operator can select alternate applications to perform image capture, post-scan processing or document indexing and storage.
